ID: GENERATE128
SLTEFSCR GRADE.

Structure (WIP)

{ [array] }-{ [array] }

Elements

Mandatory

- Taste
- Era
- Feeling
- CharImage (character image)
- CharBackground (character background)
- Emotion

Optional

- Sound
- Location
- Pain (feeling)
- Object

ID

Encrypt memory and store with a 128 character ID

The ID consists of UTF-32 characters, giving it plenty of combinations. When needed, it can be expanded easily to a 256 character ID.

Examples

- Structured nostalgia
- Writing down this system

- NODATA

Something in 2004

- Location: Bathroom, Car ride, Washington State (USA)
- Smell: None
- CharBackground: Green murky skies //// Picked up from the movie
- Object1: Sean Patrick Myrick (v5.x)
